Quiz

Sprint Planning

- Remove HTML definitions for the buttons and add to the JS

- Debug the issue of question 37

- Change button status to recording… and Remove record and stop buttons it on clicking stop

- Randomise questions within subsection

- Remove continue to next question button

- Make the test progress clickable

- Add a <br> between the passage and question

- Show subsections in the test progress

- Set time limit for the test, if the time is up then take them to the end of the test

- At the end of the test, if there time left, then let the test taker review the questions

- Record audio isn't working on safari and IE. Assuming there will be a larger pool of test takers with IE, use flash type of plugins to make it work on all browsers. Also, compress wav to mp3.

- Test report should show the total score and total score.

- Detailed feedback should be disabled

- Admin users should have analytics such as the distribution of scores, response times and item wise analysis

- Admin users should send invitations to a group of test takers, track their status, progress and test scores

- Admin can add evaluators to the system, essays and speaking questions will be automatically assigned to the appropriate evaluators, evaluators can add scores to the essays which should then be merged with the test reports

- Enable this for TOEFL
